zhenqi@umich.edu | 734-834-8261 | <https://jenny0229.github.io/>

EDUCATION

University of Michigan (UM), Ann Arbor, MI

Exp May 2026

Bachelor of Science in Computer Science, Minor in Music (GPA: 3.95/4.0)

Course Highlight: Data Structure and Algorithm, Machine Learning, Web System, Operating System, Database Management System, Logic Design, Computer Organization, Agent-based Modeling

SKILLS

Programming Languages: C++, C, Python, JavaScript, HTML/CSS, Verilog, SQL, NoSQL(MongoDB), R

Tools and Frameworks: React, ReactNative, Express.js, Unity, Figma, Scikit-learn, Pytorch, LaTeX, Git

WORK EXPERIENCE

GigXR x UM Medicine

Jan 2025 - Present

Software Engineer

- Creating AI algorithms using natural language processing to assess medical students' conversations with AI patients, focusing on scoring and real-time guidance, as part of an industry-focused start-up project.
- Enabling customizable assessment rubrics and actionable feedback to improve communication skills while collaborating closely with a cross-functional team.

University of Michigan Transportation Research Institute (UMTRI)

May 2024 - Present

Software Engineer Intern

- Design and develop a cross-platform app using *React Native*, *Figma*, and *AWS*, serving as a customizable research toolkit for transportation studies.
- Collect sensor data, perform sensor fusion filtering, signal processing, and data analysis in *Python*.
- Employ agile methodology to manage tasks and ensure effective team collaboration.

PROJECT EXPERIENCE

Transgender Healthcare Initiative: "Affirmative"

Sep 2023 - Feb 2024

- Developed a transgender healthcare website with *HTML/CSS*, *JavaScript*, *Python*, and *REST API* design that include search, rating, and ranking features to help the community identify health resources.
- Conducted user research, gathered data, built business models, and developed products.
- Awarded first place in Tech+Innovation Jam 2023 with a \$5k prize and first place in Michigan Business Challenge 2024 with a \$15k prize.

Multi-Threaded Pizza Delivery System

Jan 2025

- Designed and implemented a multi-threaded C++ program to manage a pizza delivery system, utilizing mutexes and condition variables for synchronization.
- Developed proximity-based matching algorithms and ensured efficient, thread-safe operations for drivers and customers.

Fakebook Database and JDBC Integration

Aug 2024 - Sep 2024

- Designed and implemented a relational database schema for Facebook using *Oracle SQL*.
- Integrated the database with a *Java* application via JDBC, enabling dynamic data interaction and secure, efficient database management.

ACTIVITIES

Rewriting the Code (RTC), Member

Nov 2023 - Present

Microsoft, Technology Education and Learning Support, Teaching Assistant

Sep 2023 - May 2024

UM, Department of Mathematics, Math Tutor

Sep 2023 - May 2024
